

LOCKBOX PROGRAM

The Fire Department is stressing the importance of a Knox Box key lock system. This system became mandatory in 2000 by Town of Cortlandville Local Law no. 1-2000. All new structures that have a fire alarm system must provide a Knox box on the structure. Any existing structures other than one or two family dwellings were to comply with the local law on January 1, 2001. This system provides a secure means to store keys to a structure for fire department use only. This allows immediate mitigation of a problem by the department without having to wait for a key holder to respond. This saves valuable time and will prevent unnecessary damage during forced entry.

If you have any questions regarding the fire department, its services, or setting up a tour of your facilities, please feel free to contact the Town of Cortlandville Code Enforcement Office who will pass said requests along to the Cortlandville Fire District. The Code office may be reached at 607 756-7490.

The Cortlandville Fire District Knox Box ordering code is: PS-42-257-03-99

To order a Knox Box for your building please visit our website at:
